

PRODUCT INFORMATION SHEET

DESCRIPTION:

Charge is a foaming cleanser polisher and detergent in a powdered form. Dirt and grime are removed by the detergent action and rinsed away.

Surfaces are polished as the abrasive action removes stains and marks.

Fat and grease are saponified by the alkaline nature of Charge and then easily removed by rinsing or wiping off.

The typical surfaces where Charge can be used with excellent results are:- stainless steel, porcelain, all metals, glass, plastics, baked enamel, ceramics, wood and plaster.

FEATURES AND BENEFITS:

- Economical to use - as a small shake of the container supplies enough product to clean a large surface.
- Foaming when in contact with water allows the fine granules to penetrate into the smallest cracks
- Charge will do a multitude of jobs on many different surfaces
- Cuts grease and grime quickly as product is 100% active.
- Ready to use product - no mixing or adding other materials before use.
- Being so fine it reduces the risk of scratching the surface.

TECHNICAL INFORMATION:

Appearance	White free flowing powder
Odour	Floral
pH	11.50 – 12.50 (1% Solution)
Specific Gravity	Approx. 2.60 ± 0.01
Percentage Volatiles	Not applicable
Solubility in Water	Soluble

USE:

Moisten the surface with water then sprinkle Charge on area to be cleaned. Using damp cloth/sponge plus a little muscle power on soiled area to clean. Rinse with clean water and if needed dry with clean cloth. Use sparingly.

SAFETY: This material is not classified as hazardous according to criteria of Safe Work Australia.

Avoid contact with skin and eyes. Avoid breathing dust, fume, gas, mist, vapour or spray. Wear overalls, safety shoes, impervious gloves and safety glasses. Use only in well ventilated areas. Wash hands after use. Keep containers closed when not in use.
