

# Water Saving Urinal Maintenance System

## PURPOSE

To save water and maintain clean and hygienic toilet conditions.

## DESCRIPTION

This system is the simplest way to cut down on the water wasted flushing urinals. No need to retrofit new urinals or plumbing drain traps that are expensive to install and maintain.

Your existing urinals are easily converted by simply turning off the water, placing some tablets into the trough and effecting a daily swab and rinse with a few litres of 'activated' water,

## PRODUCTS TO USE

Aquifier White tablets

Aquifier Blue tablets

ProKleen toilet bowl and urinal cleaner & Master Blaster drain cleaner (use only if required for initial renovation clean)

## DIRECTIONS

Daily:

1. Post 'Cleaning Sign'.
2. Place one 'Aquifier White' tablet into a bucket of hot water. Wait 15 minutes to allow water to be 'activated'. Using the 'activated' water, swab and rinse the entire urinal face, mop urinal step and surrounds. Pour remaining water into urinal drain.

Note: The one 'Aquifier White' tablet will not dissolve completely and can be used for several (4 or more) buckets of hot water until dissolved.

Monthly:

1. Place one 'Aquifier Blue' tablet per metre into the urinal trough. These will slowly dissolve over the following weeks.

## Initial Renovation Clean:

Initially and as may be required effect a renovation clean and drain treatment to remove any uric encrustations, rust stains, lime scale, organic deposits or blockages.

1. Clean urinal and surrounds thoroughly with ProKleen toilet bowl and urinal cleaner.
2. Treat with Master Blaster drain cleaner.

Note: Initial renovation clean will depend on the type and condition of the facility and drainage system, regular maintenance provided, and other variables. Some urinals may not require an initial renovation clean.
