

MACHINE DESCALE *Dishwasher Scale Remover*

PRODUCT INFORMATION SHEET

DESCRIPTION:

MACHINE DE SCALE is a powdered acid product that easily removes the build up of insoluble hard water irons, known as scale from dishwashing and glass washing machines. Highly effective in hard water conditions.

FEATURES AND BENEFITS:

- Removes rust and stains at a low concentration
- High Quality
- Economical
- Completely Soluble

TECHNICAL INFORMATION:

Appearance	White Powder
Odour	None
pH	Approximately 1.00-1.20 (1% Solution)
Specific Gravity	1.00
Solubility in Water	Completely Soluble

USE:

For Industrial use only. Turn off detergent dispensing equipment. Drain wash water reservoir, rinse and clean the filters, and then fill reservoir with fresh water. Add 500gm to 1kg of Machine De Scale to the wash water reservoir. Run wash cycle manually for 10 minutes. Inspect machine to check that all scale has been removed. If some scale remains operate machine for a further 10 minutes. Drain wash water reservoir. Rinse machine thoroughly (at least 3 times) before inserting the plug into the drain. Turn on the dispensing equipment and refill the machine ready for use.

SAFETY: Causes severe skin burns and eye damage.

Keep out of reach of children. Read label before use. Do not breathe dust, fume, gas, mist, vapours or spray. Wash hands, face and all exposed skin thoroughly after handling. Wear protective clothing, gloves and eye/face protection.
