

## **PEEROXY**

### *Powder Oxygen Bleach*

#### **PRODUCT INFORMATION SHEET**

##### **DESCRIPTION:**

PEEROXY cleans, brightens, softens, sanitises and deodorises white and coloured fabrics. PEEROXY is formulated for use in commercial, institutional and domestic laundry systems.

One of the advantages of using an oxygen bleach such as PEEROXY is that you can get rid of stubborn dirt and organic stains without having to use toxic and hazardous materials like chlorine bleach. Oxygen bleaches are also color-safe and won't bleach dyed fabrics like chlorine bleach will. They can be used on carpet, upholstery and even the most delicate linens (except for some types of wool and silk) without harming the fabric.

##### **FEATURES AND BENEFITS:**

- Better long term shelf stability than liquid hydrogen peroxide products
- Acts as a sanitiser
- Versatile in the type and severity of jobs it can tackle

##### **TECHNICAL INFORMATION:**

<b>Appearance</b>	White to off white powder with blue specks
<b>Odour</b>	No Odour
<b>Specific Gravity</b>	1.00 Powder
<b>Solubility in Water</b>	Complete

##### **USE:**

For use as a pre-soak, add one tablespoon of PEEROXY per 5 litres of water, then soak clothing for 1-2 hours. Rinse and wash in the normal manner.

For overnight soaking, add two teaspoons of PEEROXY per 5 litres of water. After soaking, rinse and wash in the normal manner.
