<b>Appearance</b>	Clear mobile liquid
<b>Odour</b>	Odourless
<b>pH</b>	12.0 – 12.5
<b>Active</b>	Ethanol (Denatured) 2.35% g/g, Benzalkonium chloride 1.44% g/g, Decyl dimethyl octyl ammonium chloride 1.08 % g/g, Dimethyl-didecylammonium chloride 0.65% g/g, Dimethyldioctylammonium chloride 0.43% g/g.

##### DIRECTIONS FOR USE:

Hard surface disinfectant only. Not to be used on medical devices or other therapeutic goods. Store in a cool dry place out of direct sunlight. Keep container closed. Dilute with potable room temperature water only according to directions. Do not mix with detergents or other chemicals. Before use cover or remove any open food.

Dilute Mr Kill-More 1:9 with water

Thoroughly pre-clean surface with an appropriate detergent, visible soiling may deactivate disinfectant. Apply diluted solution and allow 10 minutes contact to disinfect. After disinfection is complete, food contact surfaces should be rinsed with water before use.

Only dilute quantity appropriate to complete the clean and dispose of used solutions. If diluting into a closed clean container, store in a cool dry place out of direct sunlight for no longer than 7 days. Discard solutions if stored incorrectly or it becomes contaminated.

**SAFETY:** Causes severe skin burns and eye damage.

Keep out of reach of children. Read label before use. Do not breathe dust, fume, gas, mist, vapours or spray. Wash hands, face and all exposed skin thoroughly after handling. Wear protective clothing, gloves, eye/face protection and suitable respirator.

Non-Hazardous solution according to Safe Work Australia once diluted to 1:9 with water
